

Site solutions to help your project run smoothly.

At Portable Solutions Group, we believe the job site environment matters—both inside and outside the perimeter. For more than two decades, we've partnered with construction and industrial leaders to create spaces that improve safety, strengthen security, and support the retention of skilled workers.

Through innovative modular solutions for access control, workforce amenities, and critical job site operations, PSG delivers turnkey products that keep projects operating safely and on schedule.

Our solutions:

Modular Access Control (MAC) portals provide secure, efficient personnel entry with multiple lane configurations and optional guard offices, credential integration, cameras, and reporting capabilities.

Modern restroom solutions that give workers the comfort, privacy, and respect they deserve with private stalls, running water, climate control, and utility-tie or self-contained configurations.

Vehicle Access Control (VAC) solutions help manage site traffic with durable gate arm systems, controlled entry points, and optional climate-controlled guardhouses.

Portable Guardhouses provide a secure, climate-controlled workspace at critical entry points, with multiple size options available to support a wide range of site security and access control needs.

Built for demanding sites.

PSG supports large-scale projects across:

- Data centers
- EV battery plants
- Refineries
- Petrochemical Sites
- Industrial Facilities
- Construction
- Outages
- Turnarounds

Why PSG?

Safety. Security. Compliance.

Our solutions help teams reduce unauthorized entry, support reporting needs, improve worker conditions, and keep projects moving.

Turnkey and field-ready.

We support layout planning, delivery, and integration so your team can deploy quickly and operate with confidence.

Scalable solutions.

Choose from proven product lines or work with PSG to configure a solution around your site flow, workforce, risk profile, and schedule.
